THE INDIANAPOLIS NATIONAL BANK Designated United States Depository. Corner Room Odd-fellows' Hall.

CONDITION OF THE MARKETS

THEO, P. HAUGHEY, Pres'L. H. LATHAM. Cash.

Fairly Active Trading in Wheat. Accompanied by an Unsettled Feeling.

Heavy Speculative Trading in Corn Develops Considerable Weakness-Oats Weak and Lower-Provisions Quiet and Dull.

MONEY, BONDS AND STOCKS.

The Usual Saturday Market in New York, with a Heavy Closing. NEW YORK, Sept. 22 .- Money on call was easy at

· 1 per cent. Prime mercantile paper, 54@71g per cent.

Sterling exchange was quiet but steady at \$4.8419 for sixty-day bills, and \$4.87% for demand. The total sales of stocks to-day were 92,266 shares, including the following: Delaware, Lackawanna & Western, 4,200; Erie, 1,750; Lake Shore, 7,555; Louisvilla & Nashville, 10,252; Missouri Pacific, 2,121; Northwestern, 7,138; Northern Pacific, preferred, 4,115; Oregon Transcontinental, 9,920; Reading, 3,520; Richmond & West Point, 4 350; St. Paul, 10,630; Texas Pacific, 2,400; West-

ern Union, 1,505. The stock market to-day was nothing more than the usual Saturday's traders' market, being quiet, and, as the room was bearishly inclined, it was in the main weak. The opening was made at declines extending to 38 per cent, and while London had a few buying orders, and the brokers identified with the "bull" interests were making a few purchases, the traders were sellers, as were also almost all interests outside of those mentioned. Further slight declines were made in the early trading, but the strength in Lake Shore and New England rallied the list, and fractional advances, ranging up to 58 per cent., were established with C., C., C. & I., Lake Shore and New England leading. Louisville & Nashville, however, soon displayed weakness, and the advance met with a check after the first half hour, when the entire list gave way. The news of the day was of very little importance, except the report from Chicago that new complications on the dressed-beef question had come up, and that the agreement to advance rates would probably not be carried out, with the expectation of more trouble with em-ployes on the Burlington & Quincy. Under the rireumstances the decline made more progress after 11 o'clock, with the Southern properties and the grangers leading the downward movement. There was a slight rally towards 12 o'clock, but the market closed heavy at about the lowest prices. The final changes are, with but few exceptions, in the direction of lower figures, though they are for fractions only, except in St. Paul, which is down 1 per cent., while Burlington & Quincy, notwithstanding the trouble

with its employes, rose 1 per cent.

The railroad bond market, as usual, was dull and without feature of special importance, prices showing little or no fluctuation, and the dealings were devoid of interest. There was some animation in the Texas Pacific seconds, and they furnished \$82,000 to the day's total of \$461,000. The tors of the dealings was steady throughout, and the final changes are for the smallest fractions. The sales of bonds for the week were \$5,261,000, against \$7,600,000 for the

State bonds were neglect	ed.

CHICAGO, Sept. 22.—There was fairly active trading in wheat to-day, and the feeling was unsettled. The opening was strong with sales at 140 3sc above yesterday's closing figures, and advanced 4c more, with only slight fluctuations, influenced by reports that the crop of Dakota and Minnesota would be 33 1.3 per cent. less than last year, and 10 per cent. additional short for loss in quality. After fairly active trading at the advance, the market ruled easier, followed by a decline of 7sc. This reaction was attributed to rumors circulated that the estimated receipts for Monday at Minneapolis were placed at from 800 to 900 cars, though later advices stated that probably 700 might be recived, but that it was all guesswork, and nothing positive could be ascertained. At the closing hour of the session the market realed ket ruled easy, and the closing was about 380 higher for December, and unchanged for May. A feature of the market was the selling of May within 2580 of December. There was heavy speculative trading in corn, and the feeling developed much weakness. The influence on the market was the same as heretofore, namely, the large receipts, with no apparent pros-pects of falling off. Transactions almost centered in October, which was weak, offerings being large from all quarters, while little or no demand existed. The market opened quite excited, with sales at the same to sold off 1205se, reacted 3sc, but again ruled weak, declining in all 1 sc, reacted some, and closed with September and October 121 sc lower than yesterday, and May 182 14c lower. It was said that considerable corn was delivered this morning and that this came on the market, creating a weakness. The demand for cash was less urings. Under the influence of rather liberal receipts and the weakness in corn, oats were weak, closing 40 lower than yesterday. Provisions were dull most of the time, and fluctuations, as a rule, were narrow. October pork sold at \$14.40@14.50; January at \$13.72 @ 13.85, closing 7 to lower than yesterday. Lard was duil and about steady, save for November, which was bid up about .20c by manipulation. Ribs closed .10c lower for October and .022c lower for January. The leading futures ranged as follows: Opening. Highest. Lowest. Closing.

Common and light, \$50 6.30; packing and butchers', \$5.9006.50. Receipts,

750; shipments, 820. INDIANAPOLIS MARKETS. A Big Week's Trade and the Situation Prom-

ising for the Future. INDIANAPOLIS, Sept. 22. As would be expected on a State fair week, the wholesale men report a big trade. Stocks of the dry goods men show marked reductions, notwithstanding the large lines of goods they are carrying. The steady, strong tone to prices stimulates trade seemingly, as the bills purchased are larger than they have been in some years past. The last three years retail dry goods men have been copying after the grocers somewhat, buying only to meet immediate requirements, but so little prospect is there that the markets will weaken in the next six monts that it is perfectly safe to stock up liberally. Grocers had a busy week. Here is another market in which strong prices help the danger of the wholesale or the retail men getting more goods than they can safely carry, as a scarcity of sugars is anticipated for mouths to come. Coffees are, as well, firm in tone and advancing in their tendency. But the future of the bean is much less uncertain that that of sugars. Other staple articles all firm at quotations. Druggists report trade good and prices firm all along the line. Firmness is also a leading characteristic of the iron, hardware and tinuers supplies markets. The produce men have had a busy week, seldom disposing of more goods in a like period than they did in the week ending Sept. 22. Poultry is in good demand at the advance of Friday. Higher prices need not be looked for in the near future, or at least the shippers state that the present quotations are the top notch. Butter is more plenty, yet good stock readily brings good prices. Eggs are in light supply and firmer. The provision market the latter part of the week has been a little off, although prices on the jobbing business have not been as yet affected by the weakness in the wholesale market. Hide men report a brisk market with the usual range of prices, the recent effort to spring prices failing to materialize. The seed market is active; prices firm.

It was an off day in the local market; bidding or 'Change was tame. Wheat in fair demand on light receipts. Corn lower on heavy receipts the last few days and in sympathy with other markets. Oats in moderate demand and steady in price. Track bids to-

clemens Vonnegat, jr., to John W. Smith et al., lot 7 in Geo. Brown's subdivision

F. T. H., in Western Rural. Three years ago, after I had sold out all my horses, I started out to buy a good span of mares. After looking several days and finding nothing that suited me for less than \$300 to \$350. I turned my attention to those that were smaller, and selected three young mares instead of two larger ones. The three weigh about 3,200. I paid for the three \$250. Now, after using them three years and raising five colts, I would not again change them for large horses. I Ticket office, 26 S. Illinoisfstreet.

Two of them will do a great deal of the work on a small farm of 100 acres under cultivation, and then my wife or daughter can have the third to go to the store or postoffice when necessary. The heavy work of ploughing, harrowing, seeding or binding is done much easier and quicker than any two large horses I have ever owned could do the work. Being light and lively, it does not take them all day to get around the corners. From my experience I advise any farmer who needs a ton and a half of horse flesh to buy three rather than two horses, as far more profitable, and they will do more work in a year.

Philadelphia Record

Spring is not the real busy season. It is a time when work must be hurried, in order to take advantage of the early rains and allow the plants as long a period as possible for growth, but the fall is the season when the work of winter must be done before severe weather approaches. Fall work is often done too hurriedly. the consequence being that many things are neclected that should receive careful attention. Certain kinds of work are postponed until win-ter, but work that can be done now should never be put off until later, as it may never be reached. When a tarmer is so busy that he cannot do all that should be done, he needs more help and should procure it. To attempt to do in the future that which should be done now will entail greater labor and expense than are demanded.

The mending of the fences and repairing of the ditches and drains are usually laid aside. along with cutting the supply of wood, for win-ter employment; but, though this has been the custom in the past, yet it is doubtful if such work can be economically done in winter. Digging post-holes when the ground is frozen, and haulng wood over rough roads, or being caught with a load in a snow-storm, are more laborious than doing the work in the fall, when the materials for building can be more easily procured, and the work done in a shorter time. All the outdoor work should be done before the winter comes on. The winter will give ample employment with inside work. Manure-making and stock feeding are jobs for winter, and much of the grain can be threshed and cleaned later on. If any of the work to be done is to be postponed let it be such as can be done under shelter. All land intended for spring seeding should be plowed in the fall, not only for the purpose of avoiding the hurry of work in the spring, but also to assist in getting the land in better condi-

tion. There is no surer remedy for destroying cutworms in the soil than fall plowing, which opens the soil to the frost, thereby not only destroying the worms and other insects, but also assisting to pulverize the soil by alternate freezing and thawing, the expansion and contraction causing all lumps and clods to fall to pieces. Where the soil is well drained no plowing will be necessary in the spring, if the ground be well broken late in the fall, but on some locations a one-horse plow may be used crosswise on furrows that were made in the fall. If the outside work can be done before winter the spring will open with the beaviest portion of the work done, leaving only such as cannot be done at any other season except in spring.

The Value of Grapes.

Iowa State Register. This is the season when all persons, young or old, sick or well, should eat grapes. If thoroughly ripe they burt no one and benefit all. They are anti-bilious, so much so, that in the early days in Indiana and Ohio, when the fever and ague and bilious fevers prevalent in the summer and fall, the pioneer Methodist preachers, who were about the only doctors and spiritual comforters the agoe-stricken population had, used to cheer the people by assuring them that if they could possibly stand the affliction until the grapes were ripe, then eat largely and often of them, they soon would be well. Grapes are a febrifuge, a tonic, a stimulant, and they are mildy, but certainly valuable as a diuretic. And as we have said before, fathers and guardians of families who fail to raise a plenty of grapes for their families, and especially for their little ones, are criminally negligent of the health and the true physical development of their sons and daughters. And they permit themselves to sink into premature old age, which might be protracted in vigor for many years longer than they are. Grapes are the healthiest fruit which ever grew. They contain in their native and best condition all of the virtues attributed to the purest of wine, and none of its deleterious and deadly qualities imbibed by fermentation and decay. Take your wine as God makes and intends it, in the ripe and luscious grape, the health-inspiring and life-

A remedy for the cure ot flux, the deadly dissease prevalent at this season of the year, is reprinted for the benefit of our readers. It has been tried and found to be an almost sure cure if taken in time, and consists simply of one egg well beaten, and two spoonsful of sugar in a cup of milk. It is a pleasant mixture to take and many have tried it with success. It should be taken at one dose, and if relief is not afforded, take another cupful .- South Bend Trib-

sustaining grape. And lift up your hearts in

gratitude that Providence has provided in the grape an antidote to the malarias which neces-

sarily come by the decay of vegetable matter just at the season when the grape ripens for its

great mission of healing the nations.

AYER'S Ague Cure is warranted to cure all cases of malaria. Sold by druggists. Price \$1.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria, When she had Children, she gave them Castoria,
